SUN PROTECTION POLICY

Australia has the highest incidence of skin cancer in the world. Skin damage, including skin cancer, is the result of cumulative exposure to the sun. Much of the damage occurs during childhood and adolescence.

Research suggests that severe sunburn is a contributor to skin cancer and other forms of skin damage such as wrinkles, sunspots, blemishes and premature ageing. Most skin damage and skin cancer is, therefore, preventable.

This Policy has been developed to ensure that all students and staff attending the Silver Tree Steiner School are protected from over-exposure to the harmful UV radiation from the sun. It documents our comprehensive sun protection practices. These practices will be applied to all school activities including sports carnivals, excursions and camps.

We aim to help reduce the incidence of skin cancer by encouraging all members of the school community to take effective skin-protection measures.

Sun protection is important all year round not just in the summer months, so it is important that all parents and staff of the Silver Tree Steiner School continue to be vigilant in implementing the skin protection strategies in the cooler months as well as the warmer months.

The aim of this policy is to promote among students, staff and parents:

1. Positive attitudes towards skin protection.
2. Lifestyle practices which help reduce the incidence of skin cancer.
3. Personal responsibility for decision-making about skin protection.
4. Awareness of the need for environmental changes in schools to reduce the level of exposure to the sun.

OBJECTIVES

The goals of the Sun Protection Policy are to:

1. Increase student and community awareness of skin cancer.
2. Assist students to develop strategies that encourage responsible decision making about skin protection.
3. Work towards a safe school environment that provides shade for students and staff.
4. Encourage students, parents, teachers and staff to wear protective clothing, broad-brimmed, legionnaire or bucket style hats and sunscreen during high risk times such as lunch times, sports, excursions and camps.
5. Ensure that parents are informed of the school's Sun Protection policy.

IMPLEMENTATION

Curriculum

- Sun protection and skin cancer awareness programs are incorporated into the appropriate Key Learning Areas of the school curriculum.

Uniforms/clothing

- Students are actively encouraged to wear broad-brimmed, legionnaire or bucket hats whenever they are outside in Terms 1 and 4, but particularly for organised outdoor activities such as sports carnivals and outdoor excursions.
- Staff are required to wear broad-brimmed, legionnaire or bucket hats for all outdoor activities, including yard duty in Term 1 and 4.
- Parents are encouraged to wear broad-brimmed, legionnaire or bucket hats when participating in and attending outdoor school activities in Terms 1 and 4.

Sunscreen use

- Students and staff are actively encouraged to apply a minimum SPF 30+ broad-spectrum water-resistant sunscreen i.e. before outdoor activity. A preservative-free, low-chemical sunscreen is made available to staff and students by the school, located at Reception and with the Physical Education teacher.
- The type of sunscreen made available to staff and students will be determined by the school and may change. At the time of writing this policy, Silver Tree Steiner School provides *Signature Sunscreen Lotion SPF 50+* by 'we are feel good Inc.'

Sport and Physical Education

- Broad-brimmed, legionnaire or bucket hat wearing is compulsory for sport and physical education (Games) in Terms 1 and 4, and during Terms 2 and 3 where the UV index is 3 or above.
- The Games teacher may choose to be indoors on days when the UV index is high.

Camps and Excursions

- Broad-brimmed, legionnaire or bucket hats, sun protective clothing and sunscreen are required for all camps and excursions. These items will be listed on the parent permission form.

Shade

- The school is working towards increasing and/or maintaining shade in its grounds, particularly in areas where students congregate e.g. lunch and/or outdoor lesson areas.
- Temporary shade structures will be considered as a short-term measure and for events such as Open Day.
- Students and staff are actively encouraged to use shade.

Assemblies

- Outdoor assemblies are either scheduled when the UV Index is below 3 or held in an area where all students can be in the shade.

Note: *UV alert times are available from the Bureau of Meteorology www.bom.gov.au/uv*

OCCUPATIONAL HEALTH AND SAFETY

Consideration is given to sun protection for all teachers/staff involved in outdoor activities, including yard duty.

Games teachers are required to take appropriate sun protection measures as they are particularly at risk from UV radiation.

SUN PROTECTION

Students will be actively involved in initiatives to protect the school community from over-exposure to the sun.

Sun protection will be promoted throughout the year via the school newsletter, assemblies, daily messages, parent and staff meetings and whole school activities.

During terms 1 and 4, children will be directed to play in the shade of the verandahs if they do not have a hat.

“No hat – Play in the shade of the verandahs”.

MONITORING

This policy will be monitored by the Head of School and Occupational Health and Safety Representative who will ensure:

1. All new staff are briefed on the Sun Protection policy as part of the induction.
2. The Sun Protection policy is included as an agenda item for the first Monday News of Term 1 and Term 4.
3. The Sun Protection policy is summarised in the Parent Handbook and made available on our website.
4. Sun Protection practices are promoted regularly from the beginning of September through to the end of April.
5. Cancer Council of Western Australia is contacted annually to ensure that up-to-date information is maintained on SunSmart resources and policy guidelines.

EVALUATION

The Head of School and OHS Representative will review the effectiveness of this policy and they will:

1. Review the SunSmart behaviour of students, staff, parents and visiting guests.
2. Assess shade provision and usage and make recommendations.
3. Check plans for future buildings and grounds with regards to shade provision (in consultation with the School Board).
4. Evaluate and update the sun protection and skin cancer prevention component of the curriculum in collaboration with the teaching facility.
